NitWit PICTURES

Our recent NitWit training at rp Visual Solutions in Santa Ana, CA, was well attended. *Engineering for Calibration—Fine Tuning the Display* was the topic presented by Alan Brawn, who represents ImageScience Foundation (ISF).

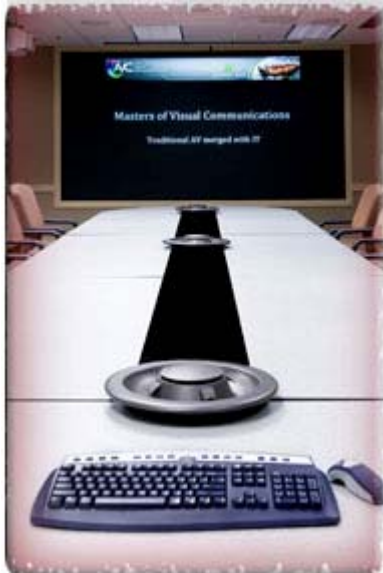

Brawn comments, "*Continuing education and networking is key to personal and professional growth of individuals in our industry. RP Visuals' Nitwit is a perfect forum to expand your knowledge, meet and network with colleagues, and do so in a very comfortable environment. Well done Randy and team RPV!*"

Integrated Media Systems-East installed a side bounce rpm Rear Projection Mount at a government facility. IMS-East was constrained by space and together with rp Visual Solutions designed within the allocated space an impressive 163" diagonal Image (77" x 144") using the rpm Rear Projection Mount provided by rp Visuals. This system replaced six SXGA projectors and resulted in more total pixels with much greater uniformity throughout the full screen area.

System Integration by Integrated Media Systems-East in Herndon , Virginia

rp Map

**NitWit comes from the words Nit & Wit. Nit is a measurement of light, and Wit is quick knowledge.*

Therefore, this newsletter is for Bright and Sharp AV Souls.

Please let us know how we can be of assistance in designing your next display mount project.

Our Room Plan Worksheet is available as a PDF or Interactive Online.
