

Innovative Visual Display Solutions Tailored to Fit Your Needs

GlassVizion—LC

Polarizing LC Glass ● Snap Glass ● Privacy Glass

GlassVizion panels are a revolutionary breakthrough in display technology which can transform from a cloudy white translucent barrier to an optically clear state with the flick of a switch. The panels, produced by FILM between two layers of glass, are offered in sizes up to 8.5' x 16', with the LC (Liquid Crystal) film sized from 5' x 10'.

GlassVizion creates visual effects that are inVizible.

Specifications:

- From a cloudy white translucent barrier to an optically clear state with a flick of a switch
- Allows architects and contractors to provide cost-effective creative design concepts with engineering flexibility
- Can be applied to curved surfaces, cut into odd shapes, or even hole-punched to accommodate specific display applications.
- Typical Thickness—5/16" – Annealed or Laminated Glass
- Glass—up to 8.5' x 16' (Will require pieced film with 1/8" space)
- LC (Liquid Crystal) Film—up to 5' x 10'

Applications:

- Privacy Screen & Display Screen
- Bullet-proof security glass
- Hospital privacy/restriction of view
- Bank teller window and automated teller security windows
- Special effects for the entertainment industry
- Ultra-modern residential and commercial blind applications

GlassVizion windows for conference rooms, executive offices,
